PROFESSIONAL SUMMARY

Result-driven Java Full Stack Developer with around 4 years of experience in designing and developing scalable applications

SKILLS

Languages and Frameworks: Java, Spring Boot, Spring MVC, Spring Security, RESTful Web Services, Kafka, Microservices, CI/CD, JavaScript, React JS, HTML /CSS, Bootstrap, JUnit.

Databases: Oracle, MySQL.

Tools / Others: Version Control (Git), Cloud Services (AWS), Agile methodology (SCRUM), Rally, Jira, Docker, Visual Studio Code, IntelliJ, Postman.

WORK HISTORY

Full Stack Developer   **June 2021 – Current**

Tata Consultancy Services (TCS)

- Engineered an innovative automatic registration process for user services, enhancing operational efficiency and reducing manual intervention through **automated and RESTful integration**.
- Developed and computerized file parsing and data population into Oracle tables, performing data aggregation and applying strong SQL skills for efficient data management, **reducing manual work by 80%**
- Spearheaded the automation of Identity and Access Management (IIQ) requests by extracting data from LDAP, driving significant efficiency gains and enabling seamless integration of IIQ functionalities into other workflows.
- Built functionalities to add, update, and remove service IDs, generating unique IIQ request numbers, **cutting processing time by 90%**.
- Pioneered the development of a recertification process for periodic user access reviews, ensuring compliance with security standards.
- Orchestrated the creation of batch jobs for systemized recertification and access removal, adhering to strict timelines and compliance requirements.
- Collaborated effectively in an **Agile (SCRUM)** environment, closely working with project leads, business analysts, and cross functional teams to ensure timely project delivery.
- Designed and implemented a responsive, user-friendly UI for critical applications, focusing on email screens and consumer workflows using React JS, resulting in a **40% improvement** in user satisfaction.

EDUCATION

- **Bachelor of Technology in Computer Science and Engineering**
  Vaagdevi Engineering College

PROJECTS

Finance Tracker Application   Github Link

Simplified expense management application. developed in React Native (2023), parsing transcations and providing clean and eligent way to track each transcation in a secure way.

Covid Web and Mobile Application   Github Link

This React.js web application tracks and visualizes COVID-19 cases, offering insights at national and state levels with a user-friendly interface.

ACHEIVEMENTS

SPOT Award from TCS in 2023 in recognition of performance in year 2023
